

If you're building for the cloud, might as well build where the clouds look like this.

The perfect data center location, and then some.

It's not often that a business park comes with a scenic backdrop *and* the credibility of a Primary Data Center designation from TVA. But that's what you get with Conners Island – plus a location convenient to Huntsville, Alabama and its status as a booming technology hub. Located on 69,000-acre Lake Guntersville, Conners Island comes complete with an Alabama AdvantageSite designation that ensures a smooth location process. Add reliable power from TVA with excellent incentives, and you get a unique location that's as easy on the bottom line as it is on the eyes. Conners Island. It's where business lives on the lake.

- *TVA Primary Data Center Location identified by Deloitte Consulting.*
- *Ideal geographic diversity location, not vulnerable to earthquake or hurricane threats.*
- *Access to wide range of high-speed bandwidth providers, including local final mile fiber-optic connections.*
- *Unique natural setting conducive to other green initiatives.*
